

Wildlife Release Sites Needed

Do you have the perfect habitat for wild birds, mammals or reptiles? West Sound Wildlife Shelter is seeking locations to release wildlife that was evicted from their homes. These are patients from the shelter that are ready to be free and rejoin the wild populations. West Sound Wildlife Shelter tries to return animals to where they were found but in many cases new locations must be found. All animals have specific habitat requirements. If you have a small or large parcel of land or habitat for one species or many species call the West Sound Wildlife Shelter at 206-855-9057 for more details, or complete the application below and either mail it to the address at the bottom or email it to info@westsoundwildlife.org.

Wildlife Release Site Application
